

Dag 2

## Tel op en trek af

### Lebo se stalletjie

Soggens begin Lebo met 19 sakkies appels.

Teen middagete het sy 13 sakkies oor.

a. Hoeveel sakkies het Lebo verkoop?  $19 - 13 = 6$

b. Skryf jou antwoord as 'n getalsin neer.

$$19 - 13 = 6 \text{ sakkies}$$

Gee nog 'n getalsin om dieselfde antwoord te kry.

$$15 - 9 = 6 / 20 - 12 = 6$$

### Getalle-oefening

Skryf die antwoorde neer.

**1+2=3**

Gebruik ...  
+ - =

$10 + 5 = 15$	$11 + 6 = 17$	$14 - 9 = 5$	$14 - 8 = 6$
$11 + 5 = 16$	$17 + 2 = 19$	$19 - 7 = 12$	$14 - 5 = 9$
$12 + 6 = 18$	$3 + 13 = 16$	$16 - 5 = 11$	$16 - 13 = 3$
$17 + 2 = 19$	$4 + 15 = 19$	$15 - 10 = 5$	$19 - 7 = 12$

### Getallepasmaats

5      9      14

Hier is voorbeeld van hierdie getalfamilie.

$9 + 5 = 14$	$5 + 9 = 14$
$14 - 9 = 5$	$14 - 5 = 9$

Kan jy al die getalfamilies van 14 kry?

$1 + 13 = 14$	$13 + 1 = 14$	$14 - 1 = 13$	$14 - 13 = 1$
$2 + 12 = 14$	$12 + 2 = 14$	$14 - 2 = 12$	$14 - 12 = 2$
$3 + 11 = 14$	$11 + 3 = 14$	$14 - 3 = 11$	$14 - 11 = 3$
$4 + 10 = 14$	$10 + 4 = 14$	$14 - 4 = 10$	$14 - 10 = 4$
$5 + 9 = 14$	$9 + 5 = 14$	$14 - 5 = 9$	$14 - 9 = 5$
$6 + 8 = 14$	$8 + 6 = 14$	$14 - 6 = 8$	$14 - 8 = 6$
$7 + 7 = 14$	$7 + 7 = 14$	$14 - 7 = 7$	$14 - 7 = 7$

Ek gaan nou  
dieselde met die  
getal 12 doen.

12

$1 + 11 = 12$	$11 + 1 = 12$	$12 - 1 = 11$	$12 - 11 = 1$
$2 + 10 = 12$	$10 + 2 = 12$	$12 - 2 = 10$	$12 - 10 = 2$
$3 + 9 = 12$	$9 + 3 = 12$	$12 - 3 = 9$	$12 - 9 = 3$
$4 + 8 = 12$	$8 + 4 = 12$	$12 - 4 = 8$	$12 - 8 = 4$
$5 + 7 = 12$	$7 + 5 = 12$	$12 - 5 = 7$	$12 - 7 = 5$
$6 + 6 = 12$	$6 + 6 = 12$	$12 - 6 = 6$	$12 - 6 = 6$
