

# Storms and floods

## Storms

Electric thunderstorms are exciting and scary. We see lightning. We hear thunder. Lightning is dangerous. It can give you an electric shock.

A rainbow has seven colours. They are red, orange, yellow, green, blue, indigo and violet. You can only see a rainbow when the sun is behind you. The sun shines through raindrops to make a rainbow.

## Water

People need water to live. We use water for drinking, washing and growing plants. We use water in factories and hospitals.

## Rain

Rain gives us water. Too much rain causes a flood. Too little rain causes a drought. We build dams to store water. Then we have water all year round.

Read the information about storms and floods and answer the questions below.

1. What can you hear in a storm?

You can hear **thunder**.

2. How many colours are there in a rainbow?

There are **seven** colours in a rainbow.
