

Question 1:

Read the following story and answer the questions.

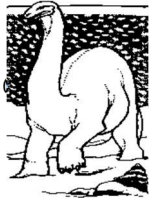

Where did they go?

What ever happened to the dinosaurs? About 65 million years ago, they became extinct. Scientists are not sure, but they think perhaps:

a) A huge star crashed into Earth, making it as hot as an oven. The heat may have killed the plants that dinosaurs ate.

b) Dinosaurs could live only in a warm climate. Over the years, the weather cooled down.

Can you imagine a Brontosaurus trying to curl up in a cave? Dinosaurs ruled the earth for about 140 million years Scientists are still finding their fossils. Who knows what other secrets may still be hidden beneath the earth?
