

### After you listen

Answer the questions using the notes you made about the places on the map.

1. Which place will be the hottest?
2. Which two places will be the coldest?
3. What does the report say about the weather where you live?
4. What is the weather really like today where you live?

### Listen to directions

Listen while your teacher reads and asks you questions about directions on the map on page 56.

### Listen to a description

1. Look at the pictures below. Who is hot and who is cold? Say how you know?
2. Listen while your teacher reads about an object that measures the weather. Find the meanings of words you do not know in the Word lists.
3. In pairs, take turns to tell each other about the object. Use these sentences to help you.

#### Word list

**temperature** – how hot or cold something is

**degrees** – the units for measuring temperature

#### Word list

**liquid** – not solid, for example water

**thermometer** – an object that measures temperature
