

Theme 9 Page 76: Classify animals

Animals belong to different groups. These are some of the groups:

insects, mammals, birds and reptiles.

All insects have six legs. Some insects have wings.

All mammals have hair. Some mammals have four legs, some have two legs and two arms.

All reptiles have **scales** on their skins. Some reptiles have long tails. Some reptiles do not have legs.

All birds have feathers, two wings and two legs.
