

## Listen and speak

Which planet is closest to the sun?

Which is the biggest planet?

Which is the red planet?

1. Listen to the instructions that your teacher will read you about how to memorise something.

2. After you have listened to the information, draw a picture of the Sun and all nine planets. Place the planets in the right order.
  - a) Label each planet.
  - b) On your drawing, show roughly which planets are big and which are small.
  - c) Include any other information you learnt about the planets.
3. Use your drawing to help you think of questions to ask your partner about the planets.

## Language practice

### Prepositions

Prepositions show the relationship of one thing to another.

Example: The planets revolve **around** the Sun.

1. Think of adjectives you can use to describe planet Earth.

2. Choose the correct preposition for each sentence.

about inside from with through

- a) Gas ... the Sun explodes to release energy.
- b) Jupiter is different ... Venus.
- c) The rocket bursts ... the atmosphere.

3. Make up sentences about the planets or space using the following prepositions.

around between beyond in
